

Sourcing & Supplying Quality Solutions Worldwide

Benefit from our combined expertise in sourcing and development of complex chemistries

syntor
by **ACETO**

- R&D and Process Development
- Custom manufacturing
- Kg to multi-ton scale manufacture
- Highly qualified technical expertise and support

- Solutions provider with worldwide sourcing expertise
- Full Regulatory services
- Refilling and repacking
- Warehousing solutions

Sourcing & Supplying Quality Solutions Worldwide

Syntor

- ▶ Specialise in the development and manufacture of fine chemicals into a range of industry sectors. Processes are developed from our UK laboratory, with utilisation of commercial production facilities in the UK, India and China.
- ▶ Utilising multi-purpose, ISO-accredited manufacturing facilities, we provide cost effective, low risk production solutions, from early stage process development through to commercial production. By maintaining an inventory of products in the UK, India and China we can offer short lead times for exports into our key markets in Europe, SE Asia and Japan.

Aceto

- ▶ Leading global chemical distributor and virtual manufacturer providing specialty chemicals, intermediates, and reagents to the life science and advanced technology end markets.
- ▶ With business operations in nine countries, Aceto distributes over 1,100 chemical compounds used principally by the pharmaceutical, nutraceutical, cosmetic and specialty chemicals industries. Aceto's global operations, including a significant staff on the ground in China and India, are distinctive in the industry and enable its worldwide sourcing, supply chain excellence and regulatory capabilities.

Provides access to a broad range of hard-to-source compounds through supply chain excellence

High quality R&D capabilities

Uniquely deep worldwide supplier base solves tough sourcing challenges

Trusted partners enables early stage development supported through commercialization

Local expertise ensures appropriate QA and quality audits

Products supplied on-time to quality specifications with end-to-end regulatory support
